

ENTYVIO Is a Prescription Medicine Used in Adults with Moderate to Severe Ulcerative Colitis or Crohn's Disease

If you have moderate to severe ulcerative colitis (UC) or Crohn's disease (CD), and one or more of the following is true, talk to your healthcare provider and ask if ENTYVIO may be right for you.

- Certain other ulcerative colitis or Crohn's disease medicines have not worked well enough.
- Certain other ulcerative colitis or Crohn's disease medicines cannot be tolerated.
- You rely on steroids to control flare-ups.

What do I need to tell my doctor BEFORE I take this drug?

If you are allergic to this drug; any part of this drug; or any other drugs, foods, or substances. Tell your doctor about the allergy and what signs you had. If you have an infection. If you are taking any of these drugs: Adalimumab, certolizumab, etanercept, golimumab, infliximab, or natalizumab. Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for you to take this drug with all of your drugs and health problems. Do not start, stop, or change the dose of any drug without checking with your doctor.

What are some things I need to know or do while I take this drug?

Tell all of your health care providers that you take this drug. This includes your doctors, nurses, pharmacists, and dentists. Have blood work checked as you have been told by the doctor.
